**Specification & Submittal Support | Assisting Reps with Project Specifications & Submittal Packages**
**Manufacturer:** Please Plant
**Contact:** info@pleaseplant.com | +1 236-323-2179

**Overview:**
Ensuring smooth project execution requires accurate specification support and well-prepared submittal packages. Please Plant provides resources and guidance to assist sales representatives, architects, designers, and contractors in selecting, specifying, and submitting the correct product information for their projects. Our goal is to streamline the approval process and ensure compliance with industry standards while maintaining flexibility for customization and substitution requests.

**Specification Review:**
Please Plant supports project teams by reviewing specifications to ensure product compatibility, compliance with industry standards, and adherence to performance requirements. While we provide technical insights based on our product capabilities, it is the responsibility of the project team to confirm local code requirements and consult with engineers when necessary.

**Submittal Packages:**
Comprehensive submittal packages include detailed product data sheets, material specifications, and compliance documentation. These documents help project teams validate product selection and gain necessary approvals from architects, engineers, and regulatory bodies. Submittals can be requested through our sales representatives or by contacting our support team directly.

**Substitution Requests:**
For projects requiring alternative product solutions, Please Plant offers assistance in preparing substitution requests. These requests must include equivalent performance data, material composition details, and a justification for the substitution. All substitutions are subject to review and approval by the project architect or engineer.

**Compliance & Standards:**
Please Plant products are manufactured in accordance with ASTM, ANSI, and ISO standards where applicable. While we ensure our materials meet these guidelines, it remains the responsibility of the specifying party to verify compliance with local building codes and project-specific requirements.

**Rep & Dealer Support:**
Sales representatives and dealers working with Please Plant have access to training materials, technical resources, and dedicated support to facilitate the specification and submittal process. We provide guidance on best practices for presenting product options, addressing technical concerns, and managing project approvals.

**Requesting Specification & Submittal Support:**
To request assistance with specifications, submittal packages, or substitutions, please provide the following information:

- Project name and location
- Product(s) being specified
- Specification details or performance requirements
- Any substitution or customization requests

For further assistance, contact Please Plant at info@pleaseplant.com.
