OVERVIEW

Please Plant is committed to delivering high-quality products that meet or exceed industry standards for safety, durability, and environmental sustainability. Our products undergo rigorous testing and certification to ensure compliance with globally recognized benchmarks, including ASTM, ANSI, and ISO standards.

COMPLIANCE & CERTIFICATIONS

ASTM
AMERICAN SOCIETY FOR TESTING AND MATERIALS

Our materials, finishes, and structural components comply with ASTM standards for corrosion resistance, fire safety, load-bearing performance, and environmental exposure.

ANSI
AMERICAN NATIONAL STANDARDS INSTITUTE

Products meet ANSI specifications for safety, ergonomics, and accessibility, ensuring suitability for public, commercial, and institutional applications.

ISO
INTERNATIONAL ORGANIZATION FOR STANDARDIZATION

Manufacturing and quality control processes align with ISO 9001 certification, guaranteeing consistent product performance and reliability.

TESTING PROCEDURES

Each product category is subjected to performance testing to validate compliance with safety and durability standards.

STRUCTURAL LOAD TESTING
Verifying weight capacity and impact resistance for benches, railings, decking, and other, load-bearing components.

ENVIRONMENTAL EXPOSURE TESTING
Assessing UV stability, corrosion resistance, and material degradation under extreme weather conditions.

FIRE & SAFETY COMPLIANCE
Ensuring adherence to ASTM E84 and CAN ULC-S102 standards for fire performance and flammability.

SURFACE & FINISH DURABILITY
Evaluating coatings for resistance to abrasion, chemicals, and prolonged use.

CERTIFICATION DOCUMENTATION

Please Plant provides certification documentation upon request, ensuring compliance with project-specific requirements. Third-party testing reports, material safety data sheets (MSDS), and technical specifications are available to confirm regulatory adherence.

CONTINUOUS IMPROVEMENT

We are dedicated to continuous product improvement and regularly update our manufacturing and testing processes to align with the latest industry advancements. Our research and development team actively collaborates with regulatory agencies to enhance product performance and sustainability.

CONTACT & SUPPORT
